

Maths Challenge

Numbers from 1 to 10

You are beginning to use numbers up to 10. Now you need to begin reading and writing numbers them. Can you see any numbers as you walk home from school or the park? It is quite tricky. Find 10 coins, beads or crayons. Anything you can hold in your hands. Put them in a bowl or bag. Now scoop up some of them. How many have you got? Can you write this number in your book? If you add one more how many do you have now? Try writing that number.
