

# Rameena's Ramadan

## Home Learning Challenges

In the story, Rameena looks out of her window at the moon and the stars. Can you see the moon or stars from your window? Can you count how many moons you can see? How many stars can you see?

During Ramadan, Rameena and her family helped other people. Can you think of a few different ways you could help other people or help at home?

Ramadan and Eid are very special times for Rameena and her family. Can you think of any special times you have had with your family? How did you celebrate? Can you draw a picture of your family celebrating a special day?

In the story, Rameena and her family visit a mosque. Can you create your own model of a mosque? You may wish to look at some pictures of mosques to help you. You could use playdough, paper or card, construction toys or empty cardboard tubes, boxes and sticky tape. We would love to see any models you make!
