

Action Aid – Year 1

Year 1 is sponsoring Hau. He is seven years old and lives in the district of Ke Sach in Vietnam. Hau is one of a family of two children and goes to a local school which lacks trained teachers, basic teaching equipment and facilities such as clean water and running toilets.

Hau's home is made from concrete blocks with a solid, flat roof. These types of homes are becoming popular in Vietnam as they provide good protection from extreme weather. Hau;s family have to boil water from a nearby well in order to prevent waterbourne diseases before using it.

With limited access to land, Hau's parents have to rely on daily labour to earn a living. This often involves agricultural work and wages can be low as the work is seasonal.

Throughout the year, we will be running fundraising events as part of our sponsorship program with Action Aid. We will also be writing to Hau and he will also write back to the children.
