

Make Your Own 3D Constellation

You will need:

- marshmallows/modelling clay/polystyrene balls
- wooden dowel/bamboo cane

Instructions

Make your own 3D constellations by connecting the 'stars' (marshmallows/modelling clay/polystyrene balls) with wooden dowel or bamboo cane. Think carefully about the distances between the stars by looking at the constellations below.

Why not have a go at making your own constellation and giving it a name!
