The Stone Age  
The Stone Age is the earliest  
period of human history, lasting  
from about 2.6 million years ago  
to the beginning of the Iron Age  
around 1200 BC. It is divided into  
three sub-periods: the Lower Stone  
Age, the Middle Stone Age, and the  
Upper Stone Age. The Stone Age  
is characterized by the use of  
stone tools and weapons.

Aura

# YEAR 3

**ARTS**  
The children have been studying the work of Vincent van Gogh and have created their own versions of his famous 'Olive Trees' painting.

**WISL**  
The children have been studying the work of Vincent van Gogh and have created their own versions of his famous 'Olive Trees' painting.

**Skills**  
The children have been studying the work of Vincent van Gogh and have created their own versions of his famous 'Olive Trees' painting.

Q: Can I use effective conjunctions to describe a character?

Although he lives on the street and has no money, Mr. Stink carries along with him an antique knife and fork with a gold rimmed china plate.

Mr. Stink may be a smelly old tramp, but however, he has quite posh manners when it comes to eating.

Even though Cleo finds out that Mr. Stink is a very nice person, he snatches away a photo away from her because it's a secret and he starts flustering.

Despite the fact Mr. Stink may look not organised, however he made Cleo's shed Although Mr. Stink is quite homely by old and poor, arranging a bed and his soul is restless even when portraits <sup>of important people</sup> and keeps on what sort of portraits <sup>of important people</sup> moving on and on.

LO: Can I recognise which materials conduct electricity?

Object	Conduction	What happens?	Conductor
Nail	✓	it lit up	Conductor
Cotton wool	✓	didn't light up	Insulator
Sponge	X	didn't light up	Insulator
Fat	X	it lit up	Conductor
String	X	didn't light up	Insulator
Wood/plg	✓	didn't light up	Insulator
Copper wire	X	did light up	Conductor
Silver wire	✓	did light up	Conductor
Playdoh	✓	didn't light up	Insulator

Conclusion: I found out what a conductor and insulator is. Also the best conductor is metal.

Write about the Egyptian landscape and find out how it impacted on people's lives in Ancient Egypt.

Black land      HELIOPOLIS

Red land      TURKISH Red land

MEMPHIS → water

Egyptians used water to grow there food and for beer sats

Trade the EGYPTIANS traded so they could be strong and rich.

Food

The Nile was big and it helped the Egyptians so they could help more beer sats by catching fish and raising.

HELIOPOLIS

Sedimentary when the Nile flooded it didn't just help the crops but it made Sedimentary

ABYDOS

Translocation

Translocation helped them move quicker and trade faster then walking up and down.

Dendera

# My Mythical Creature

Medusa

It lives in a cloudy, blue place called the sky.

She sounds like:  
She has a loud, screeching noise. ✓

She looks like:  
She looks like a bird with fluffy wings and a magic cone. Nobody knows what she looks like because when you look at her she turns into a snake. ✓

She feels like:  
She feels scary as a cute lion.

She smells like:  
She smells like smoke, but stupidly every one thinks she smells like yummy pet compost. ✓

22.9.16  
Lo: Can I describe different types of archaeologists.

**Description 2**

This archaeologist is surveying. She is looking through a piece of equipment on a tripod to try to map the site.

**Title 2**

Building recorder

**Description 4**

This archaeologist is walking across a field using a magnetometer to send a magnetic current into the ground to detect any roads, walls, hearths and other structures or burnt areas.

**Title 4**

Surveyor

**Description 1**

This archaeologist is measuring some stonework so she can draw an accurate diagram of how the wall was made.

**Title 1**

Environmental archaeologist

**Description 5**

This archaeologist is using a hand-held scanner to take an accurate picture of a tablet of very early writing. The picture comes up on his computer.

**Title 5**

Illustrator

**Description 3**

This archaeologist has just taken a soil sample with an auger, a kind of hand-powered hollow drill that is twisted into the soil. He will look at the snail shells, stones and pollen in the soil to see what he can find out about the environment.

**Title 3**

Geophysicist

**Description 6**

This archaeologist is drawing some pottery bowls to put in a book so other pottery specialists know exactly what was found on his site.

**Title 6**

Digitiser
